

Point Allerton US Lifesaving Station USLSS era

The Point Allerton US Lifesaving Station was constructed in 1889 to provide coastal lifesaving services in Boston Harbor. The original building is an Albert B. Bibb #2 Type U.S. Lifesaving Station, the first new station design of architect Alfred Buruley Bibb, who designed four station plans and two one-of-a-kind stations in his career with the Lifesaving Service.

After two years of planning and preparation; our station restoration has ben completed. Our heartfelt thanks go out to all those who have helped us meet that mission:

Humane Society of the Commonwealth of Massachusetts
Massachusetts Historical Commission
Massachusetts Cultural Commission – Cultural Facilities Fund
Vareika Construction
Spencer & Vogt Group
Restoration Fund Donors
